

- Momentive has committed to set [Science Based Targets](#) and contribute significantly to the Paris Climate Accord. These targets will help Momentive determine how much and how fast we need to reduce GHG emissions to align with efforts to limit warming to 1.5° C.
- Science-based targets provide a pathway for companies to reduce absolute greenhouse gas (GHG) emissions (Scope 1, 2 and 3) and be aligned with Paris Climate Accord.
- A key strategy in our decarbonization efforts is to collaborate with our suppliers to quantify the carbon footprint of their products (PCF) and ask them to reduce their carbon footprint to help with Momentive's Scope 3 reduction efforts.
- Supplier submission of PCFs will be a requirement for targeted raw materials, with all submitted PCFs calculated according to the Together for Sustainability (TfS) "Product Carbon Footprint Guideline for the Chemical Industry and TfS PCF exchange solution, the SiGreen platform.
