

BC 99/030 Stearyl Dimethicone Silicone Fluid

Description

BC 99/030 is an alkyl modified methylpolysiloxane for use in automotive formulations and leather care treatments.

Product Features

Excellent spreading properties.
Hydrophobic properties to provide surface protection.

Applications

Water repellent additive for car care.
Paint polishes and conditioners.
Leather care formulations.
Hydrophobic additive for a variety of household and industrial applications.

Method of use

BC 99/030 can be incorporated into both aqueous and non-aqueous formulations.

For water based systems BC 99/030 can be emulsified using standard emulsifiers and can be dissolved in a variety of solvents including Mineral oil, Esters and Iso-paraffinic solvents. 2-3% w/w is adequate for many end-use applications.

Storage and Shelf Life

Shelf life of the unopened container is 12 months from date of manufacture. If you wish to use the product after this time please contact us for approval.

Typical Properties

Melting point	approx 30°C
Appearance	White, wax like
CTFA/INCI designation:	Steryl Dimethicone

Technical Service

Our technical and sales staff have considerable experience of the use of silicone products in a very wide variety of industries and the benefit of this experience is freely available to all our customers.
