

Magnasoft* 238

Magnasoft* 238

Description

Magnasoft 238 is a new textile enhancer based on our patented (AB)_n technology that has given rise to world-renowned products such as Magnasoft SRS textile enhancer, Magnasoft JSS textile enhancer and Magnasoft Derma NT textile enhancer. Magnasoft 238 textile enhancer can help provide outstanding softness and slickness to fabrics and garments, while minimizing the problem of yellowing, shear stability and thermal migration. This new product is water dispersible and can be effective at dosage levels three to four times lower than amino silicone fluids.

Magnasoft 238 textile enhancer may be used on a variety of fabrics but may be most beneficial for synthetics, synthetic/cotton blends, polyester fleece and wool.

Key Features and Benefits

• Linear Molecular Architecture	o Effective at 3-5 g/l in the bath, as received. It may provide a high level of natural softness to synthetics and their blends with natural fibers
• High Molecular Weight	o Delivers properties similar to those of reactive elastomeric finishes, such as durability and resistance
• Hindered Amine Functionality	o Low yellowing o Good stability under most finishing conditions, including jet/overflow
• Combines Hydrophilic and Silicone Moieties	o May be co-applied with crease (durable press) resist resins, their catalysts and optionally OBAs. o Self-dispersible, no need for emulsifiers, hence potentially lower cost for formulators and mills o May be blended directly into the textile finishing bath with minimal agitation
• Low Viscosity	o Easy to handle

Typical Physical Properties

Property	Unit	Value
Appearance	–	Colorless to slightly hazy, light yellow fluid
Viscosity at 25°C	CSt	5000
Specific Gravity	–	1.046
Amine Content	%	0.12
Preferred Diluent	–	Water

Typical product data values should not be used as specifications. Assistance and specifications are available by contacting Momentive Performance Materials.

Nothing contained herein shall be construed to imply the nonexistence of any relevant patents or to constitute the permission, inducement or recommendation to practice any invention covered by any patent, without authority from the owner of the patent.

Customers should review the latest Safety Data Sheet (SDS) and label for product safety information, safe handling instructions, personal protective equipment if necessary, emergency service contact information, and any special storage conditions required for safety. Momentive Performance Materials (MPM) maintains an around-the-clock emergency service for its products. SDS are available at www.momentive.com or, upon request, from any MPM representative. For product storage and handling procedures to maintain the product quality within our stated specifications, please review Certificates of Analysis, which are available in the Order Center. Use of other materials in conjunction with MPM products (for example, primers) may require additional precautions. Please review and follow the safety information provided by the manufacturer of such other materials.

Customers must evaluate Momentive Performance Materials products and make their own determination as to fitness of use in their particular applications.
