

## Niax\* Catalyst A-577

### Description

Niax catalyst is a liquid, delayed action tertiary amine catalyst that is very selective to the gelling (urethane forming) reaction.

### Key Features and Typical Benefits

- Delayed-action allowing extended pour time for pouring complex parts
- Good flow combined with an exceptionally powerful endcure (i.e fast demould)

### Typical Physical Properties

Appearance	Light yellow liquid
Viscosity (25 °C)	20.4 cSt
Specific gravity, 25 °C	1.123
% Water	1.7
Freezing point	0 °C
Hydroxyl value	1071 mg KOH/g

Typical properties are average data and are not to be used as or to develop specifications

### Potential Applications

- Low density SRIM systems
- Microcellular elastomers
- Integral skin applications

### Patent Status

Nothing contained herein shall be construed to imply the nonexistence of any relevant patents or to constitute the permission, inducement or recommendation to practice any invention covered by any patent, without authority from the owner of the patent.

### Product Safety, Handling and Storage

Customers should review the latest Safety Data Sheet (SDS) and label for product safety information, safe handling instructions, personal protective equipment if necessary, emergency service contact information, and any special storage conditions required for safety. Momentive Performance Materials (MPM) maintains an around-the-clock emergency service for its products. SDS are available at [www.momentive.com](http://www.momentive.com) or, upon

request, from any MPM representative. For product storage and handling procedures to maintain the product quality within our stated specifications, please review Certificates of Analysis, which are available in the Order Center. Use of other materials in conjunction with MPM products (for example, primers) may require additional precautions. Please review and follow the safety information provided by the manufacturer of such other materials.

### Limitations

Customers must evaluate Momentive Performance Materials products and make their own determination as to fitness of use in their particular applications.
