SilCool* TIG1500
Thermally Conductive Silicone Compound

SilCool TIG1500 is a silicone compound used in a wide variety of thermal interfaces to manage heat in electronic applications.

Key Features and Typical Benefits

- Excellent workability enabling automated dispensing, screen printing and stamping
- Low oil separation and minimal weight loss
- High heat stability under 200ºC aging
- Low volatile content
- Extended retention of grease properties via low evaporation

Potential Applications

- Thermal Interface Material between heat spreaders and heat sinks (TIM2)
- Thermal management for power transistor, power IC, LSI systems home appliance products, LED lighting products, and general electronic devices

Typical properties are average data and are not be used as or to develop specifications.

### Current Packaging

- 2kg can in case of 10

### Patent Status

Nothing contained herein shall be construed to imply the nonexistence of any relevant patents or to constitute the permission, inducement or recommendation to practice any invention covered by any patent, without authority from the owner of the patent.

### Product Safety, Handling and Storage

Customers should review the latest Safety Data Sheet (SDS) and label for product safety

*SilCool is a trademark of Momentive Performance Materials Inc.*
information, safe handling instructions, personal protective equipment if necessary, emergency
service contact information, and any special storage conditions required for safety. Momentive
Performance Materials (MPM) maintains an around-the-clock emergency service for its
products. SDS are available at www.momentive.com or, upon request, from any MPM
representative. For product storage and handling procedures to maintain the product quality
within our stated specifications, please review Certificates of Analysis, which are available in
the Order Center. Use of other materials in conjunction with MPM products (for example,
primers) may require additional precautions. Please review and follow the safety information
provided by the manufacturer of such other materials.

Limitations
Customers must evaluate Momentive Performance Materials products and make their own
determination as to fitness of use in their particular applications.
