Technical Data Sheet

SagTex™ JSA Foam-Control Agent

SagTex* JSA

Description

Sagtex JSA foam control agent is a 100% active, specially formulated antifoam composition. This product has been developed to impart low-foaming characteristics to clear, high-actives, scour surfactant concentrate formulations. Sagtex JSA foam control agent will not separate from nonionic scour surfactant concentrates that contain less than 15% water. The resulting scour concentrate, when diluted to use concentration, will be low foaming over the entire jet scour cycle. Best of all, Sagtex JSA foam control agent is a free-rinsing antifoam and therefore will not cause fabric spotting.

Key Features and Benefits

- High efficiency foam control agent for jet scour applications
- Forms clear, stable concentrates if water concentration is less than 15%
- Free-rinsing composition, will not cause fabric spotting

Typical Physical Properties

Appearance	Water white, transparent liquid

* SagTex™ は Momentive Performance Materials Inc. の商標です。

Viscosity at 25°C, cP	250
Specific Gravity at 25/25°C	1.00 (estimated)

Potential Applications

Sagtex JSA foam control agent has been developed to provide a clear premix in high-concentration scouring surfactant concentrates. Typically, these concentrates are based on alcohol ethoxylates such as C10-15 alcohols, with 4-6(EO). The typical use concentration of Sagtex JSA foam control agent in the scour surfactant concentrate is 2-5%.

Sagtex JSA foam control agent can be used in other jet machine processes where an effective clear-rinsing antifoam is required.
