Technical Data Sheet

Silopren[™] LSR 4030

Description

Silopren LSR 4030 is a two-component liquid silicone rubber for injection moulding processes. Silopren LSR 4030 can be used to produce medical technical articles with high transparency and excellent rubber like properties.

Key Features and Benefits

Vulcanizates consisting of Silopren LSR 4030 are distinguished by the following properties:

- high stability to ozone and ultraviolet light
- neutral odour and taste
- sterilisable with ethylen oxide, steam and gamma radiation
- good transparency
- high thermal stability
- high recovery after puncture
- easy pigmentable with the LSR Colour Pastes

Typical Physical Properties

Typical properties of the rubber:				
		A-part	B-part	
Appearance		translucent	translucent	
Viscosity in Pa.s gamma = 10 s-1 at 20°C	DIN 53018	350	350	

The pot-life of the mixture of the two components (closed vessel) at 20° C is three days. Increased temperatures reduce the pot-life.

Typical properties o	f the vulcanizate:		
Mixing ratio of components A : B = 1 : 1; Vulcaniz	zation : 10 min. 175°C + 4 hrs. 2	200°C post cu	re
Density	DIN 53 479 A	g/cm ³	1.10
Hardness	DIN 53 505	Shore A	31
Tensile strength	DIN 53 504 S2	N/mm²	8,0
Elongation at break	DIN 53 504 S2	%	800
Tear strength	ASTM D 624 die B	N/mm	18
Compression set, (22 hrs at 175°C)	DIN 53 517	%	15

Potential Applications

Because of the outstanding properties Silopren LSR 4030 is particularly suitable for the following elastomeric articles: Because of the outstanding properties Silopren LSR 4030 is particularly suitable for the following elastomeric articles:

- sealing elements,
- O-rings, diaphragms,
- bellows, catheters,
- baby teats,
- respiratory devices,
- vibration dampers,
- mats,
- parts for medical technical equipments.

Processing Recommendations

Ready-to-use mixtures (of the components A and B) are fed directly to the injection-molding machine from the original containers by means of a metering and mixing unit. The mixture, consisting of the two components in the ratio 1:1, is injected into the heated mold. At mold temperatures of 170 - 230°C, the addition-crosslinking silicone rubber typically vulcanizes, without any dissociation products, within a few seconds. High curing speed and easy demolding can help enable fully automated production of a large number of articles in short cycle times.

Regulatory Compilance

• A representative sample of an analogous product to Silopren LSR 4030met the requirements of USP Class VI (maximum contact time with human tissue 28 days) and ISO 10993 under Good Laboratory Practices (GLP).

- The ingredients are listed in the BfR recommendation XV "Silicones"(1)
- Compositionally compliant with 21 CFR 177.2600 Rubber articles intended for repeated use(2)
- Tested according Eur. Pharmacopia VI 3.1.9

(1) Producer of the final article needs to test and confirm that the final product meets the extraction limits of BfR XV or corresponding EU legislation.

(2) It is the responsibility of the user to determine that the final product complies with the extractive limitations and other requirements of 21 CFR 177.2600, under their specific manufacturing procedures.

Patent Status

本書のいかなる内容も、関連特許が存在しないことを暗示したものではありません。またいかなる特許についても、その 権利者による許可なしに、その特許が対象とする発明を実施するための許可、誘因または推奨を構成することはできま せん。

Product Safety, Handling and Storage

Customers should review the latest Safety Data Sheet (SDS) and label for product safety information, safe handling instructions, personal protective equipment if necessary, emergency service contact information, and

any special storage conditions required for safety. Momentive Performance Materials (MPM) maintains an around-the-clock emergency service for its products. SDS are available at www.momentive.com or, upon request, from any MPM representative. For product storage and handling procedures to maintain the product quality within our stated specifications, please review Certificates of Analysis, which are available in the Order Center. Use of other materials in conjunction with MPM products (for example, primers) may require additional precautions. Please review and follow the safety information provided by the manufacturer of such other materials.

Limitations

Customers must evaluate Momentive Performance Materials products and make their own determination as to fitness of use in their particular applications.
