

Technical Data Sheet

XE11-B5320

Description

XE11-B5320 is a one-component, low volatile paste, alkoxy cure, thermally conductive silicone adhesive sealant. This product cures at room temperature by reacting with moisture in the air to form an elastic silicone rubber. XE11-B5320 silicone adhesive offers primerless adhesion to many substrates such as most metals, plastics, ceramics and glass without the use of a primer. XE11-B5320 silicone adhesive is non-corrosive to metals and may be suitable for electrical/electronic applications. Typical applications for XE11-B5320 silicone adhesive include sealing and bonding for thermally conductive applications such as heat generating elements, regulators and rectifiers.

Key Features and Typical Benefits

- Excellent thermal conductivity
- Low volatility; reduced low-molecular siloxane content One-component; ready to use
- Room temperature cure
- Neutral cure; non-corrosive to metals

• Low odor cure; releases an alcohol vapor during cure Excellent adhesion to most substrates

Typical Physical Properties		(JIS K 6249)		
Property_	<u>Unit</u>	Value		
Uncured Properties				
Appearance		White, paste		
Tack Free Time (23 °C)	min	5		

Cured Properties (7 days at 23 °C/50%RH)

oured roperties (7 days at 25 0/50/bit i)		
Appearance		White, elastic rubber
Specific Gravity (23 °C)		2.59
Hardness (Type A)		83
Tensile Strength	MPa	3.6
Elongation	%	40
Adhesive Strength ⁽¹⁾	MPa	1.3
Thermal Conductivity	W/m⋅K	1.3
Low Molecular Siloxane (D ₄ ~D ₁₀)	wt %	0.01

⁽¹⁾Aluminum lap shear

Typical Physical Properties, continued

Property	<u>Unit</u>	Value
Volume Resistivity	Ω·cm	2.0 x 10 ¹⁵
Dielectric Strength	kV/mm	17
Dielectric Constant (60Hz)		2.6
Dissipation Factor (60Hz)		0.005

Typical properties are average data and should not be used as or to develop product specifications.

Processing Recommendations Surface Preparation

Insure that surfaces to be sealed, coated, or bonded are clean and free of grease, lubricating oils, release agents and dirt. To optimize fast cure and good adhesion, substrates must be clean and dry before applying the RTV. Wipe away excess uncured material with a clean cloth. After curing, removal of material is more difficult.

Curing

This product cures at room temperature by reacting with atmospheric moisture. Whenever possible, a minimum of 25°C (77°F) and 50% relative humidity should be provided. Higher temperature and humidity will cause faster cures while lower temperatures and lower humidity will slow the cure considerably. This product cures from the outside (outer skin) inward, therefore, cure rate is also dependent on thickness of the material. It is not recommended to apply material thicker than 6 mm (1/4").

Bonding

This product offers primerless adhesion to many substrates. Maximum adhesion may

take up to a week to develop.

General Considerations for Use

While the typical operating temperature for silicone materials ranges from -45°C to 200°C, the long-term maintenance of its initial properties is dependent upon design related stress considerations, substrate materials, frequency of thermal cycles, and other factors.

Patent Status

여기에 포함된 어떠한 내용도 관련 특허가 없음을 의미하거나 특허 소유자의 허가 없이 특허에서 다루는 발명을 실행하기 위한 허가, 유도 또는 권고를 구성하는 것으로 해석되 어서는 안됩니다.

Product Safety, Handling and Storage

Customers should review the latest Safety Data Sheet (SDS) and label for product safety information, safe handling instructions, personal protective equipment if necessary, emergency service contact information, and any special storage conditions required for safety. Momentive Performance Materials (MPM) maintains an aroundthe-clock emergency service for its products. SDS are available at www.momentive.com or, upon request, from any MPM representative. For product storage and handling procedures to maintain the product quality within our stated specifications, please review Certificates of Analysis, which are available in the Order Center. Use of other materials in conjunction with MPM products (for example, primers) may require additional precautions. Please review and follow the safety information provided by the manufacturer of such other materials.

Limitations

Customers must evaluate Momentive Performance Materials products and make their own determination as to fitness of use in their particular applications.
